

## **Sharing Room,**

### **Activity based Education**

Sneha Care Home strives for providing our children an individualized learning opportunity and help them learn things suitable to their individual aptitude and intelligence. Therefore our academic programme is a blend of academics, value education and co-curricular activities. The motto of our academic programme is 'educate ad vitem' or 'educate for life'. Therefore, we let children learn whatever enriches their lives and activities are the principal means through which we achieve this aim.

Integration of co-curricular activities along with education is a salient feature of our education programme. We provide our children training in computer, music, drawing painting, dance, and sports based on individual aptitude and interest. We also provide them platforms to showcase their talents through organizing monthly, arts and sports week, monthly birthday celebrations and special day celebrations. We have three clubs under the activity department. The green club takes care of the vegetation in the campus, the flower club takes care of the flower garden and the pet club takes care of the pet animals.

Whatever, children learn in the class rooms they try to practice during club activities and house activities. Moreover, children also have to explain in the class what they learn while doing the club activities/house activities. We have also developed an assessment format to gauge the performance of children in activities.

Through these activities we try to assess the real aptitude of each child and guide the child for the future.
